

New requirements for AZOP Racing

Here at Sinister Fabrication and Design we would like to help keep you up to date with the racing requirements for AZOP series UTV racing. We are offering a few new items just for AZOP members and racers. Pricing is discounted for the AZOP members and will be the same at the booth at the races and we can even help with the install work as well on site.

Siren/Sounder

Starting April 2017, all UTV's will be required to have a siren to signal passing requests. This comes from several requests from the racers wanting to have a signal of approaching cars wishing to pass. We have two kits we are offering to racers which include the harness, siren, and switch. Easy install and can be done at the track if needed.
